

The purpose of the FCC is to regulate the airwaves in a way that serves the interests of the public. Sinclair Broadcasting is apparently planning of pressuring local affiliates into showing "Stolen Honor" as a "news piece". This is ridiculous, irresponsible and clearly politically motivated (as indicated by Sinclair executives' donations to Republicans). This strikes me as analogous to showing Fahrenheit 9/11 on broadcast television and presenting it as "news". Surely there would be outrage from Republicans if this were to occur?

Our news organizations are already on a clear slide in terms of the quality of analysis and information they provide the public. Please take action and prevent this further perversion of "news" on public airwaves.

Thank you.
